TECHNICAL SKILLS

🔧 **PROGRAMMING LANGUAGES**
Python, Java, C++, JavaScript, HTML5, CSS3

💻 **FRONTEND DEVELOPMENT**
HTML, CSS, JavaScript, Responsive Design, UI/UX Design, Animations

🖥️ **BACKEND DEVELOPMENT**
Node.js, Express.js, REST APIs, Authentication, Database Integration, API Development, Server Management

🧠 **ARTIFICIAL INTELLIGENCE**
OpenAI API, Google Gemini API, Prompt Engineering, AI Chatbots, AI Automation

🔧 **TOOLS & PLATFORMS**
Git, GitHub, VS Code, Firebase, Figma, Canva, Postman

SOFT SKILLS

- Leadership
- Communication
- Problem Solving
- Critical Thinking
- Creativity
- Teamwork
- Adaptability
- Time Management

LANGUAGES

- English (Professional Proficiency)
- Hindi (Native Proficiency)

INTERESTS

- Artificial Intelligence
- Web Development
- UI/UX Design
- Cyber Security
- Tech Research
- Problem Solving

PROFESSIONAL SUMMARY

Ambitious and highly motivated Software Developer and AI enthusiast with strong expertise in full-stack development, artificial intelligence, modern web technologies, and UI/UX design. Passionate about building innovative, user-centric, and scalable applications that solve real-world problems through clean code and intelligent automation. Dedicated to continuous learning and delivering impactful digital solutions.

EXPERIENCE

AI/ML FULL STACK DEVELOPER INTERN June 2026 – Present
ANTI-AI, Kanpur, Uttar Pradesh, India

- Working on AI-powered full-stack applications, intelligent automation systems, backend APIs, frontend development, and AI integrations.
- Collaborating with the technical team to design, develop, test, and deploy scalable software solutions and modern web platforms.
- Implementing clean code practices, version control, and performance optimization.

Projects at Anti-AI:

1. **Antidote** – Developed a security-focused AI-powered web platform that provides intelligent digital protection and security solutions. Built responsive UI, integrated backend services, and enhanced user experience.
2. **Review Bot** – Developed an AI-powered GitHub code review platform that automates repository analysis and pull request reviews. Implemented features for bug detection, security vulnerability analysis, coding standards enforcement, and intelligent AI-generated review suggestions.

PROJECTS

1. **TRUE BLADE** Gaming Brand | Content Creator Identity | Professional Branding
Designed and developed the complete branding identity for True Blade, including premium logo design, visual identity, content branding, and a modern aesthetic for gaming creators, esports, YouTube, and social media.

2. **KEYS.AI** Artificial Intelligence Platform
An advanced AI platform focused on intelligent automation, AI tools, productivity, and modern conversational AI. Built with support for multiple AI providers, scalable architecture, and a futuristic user experience.

3. **REVIEW BOT** GitHub AI Code Review Assistant
AI-powered platform that automates repository analysis and pull request reviews, helping developers identify bugs, improve code quality, detect security vulnerabilities, and receive intelligent code improvement suggestions.

EDUCATION

Bachelor of Computer Applications (BCA)
Allenhouse Business School, Kanpur
2024 – 2027

CERTIFICATIONS & ACHIEVEMENTS

- National Conference – Research Paper Presentation: "Enhancing Women's Safety Through Technology" (Feb 8–9, 2025)
- Hackofiesta 6.0 State Level Hackathon – Silver Medal (Feb 4–9, 2025)
- Allentech Hackathon 2025 – Team TitanCoders (Feb 20–22, 2025)
- Exuberance 2026 Tech Expo – 1st Runner-Up (Jan 7–10, 2026)
- International Conference ICHIS-2026 – Poster Presentation: "Why AI Era Breaks Traditional Education" – 2nd Runner-Up (Jan 30–31, 2026)
- Internal Smart India Hackathon 2025 – Participation (Sept 20, 2025)
- Hackathon 2.0 Inter College Competition – Silver Medal (March 17–18, 2026)
- International Conference ICHIS-2026 – Poster Presentation – 2nd Runner-Up (Jan 30–31, 2026)
