

HARMAN SADHWANI

AI/ML FULL STACK DEVELOPER
AGENTIC AI DEVELOPER|SOFTWARE ENGINEER

Kanpur, Uttar Pradesh, India

PORTFOLIO

sadhwaniharman@gmail.com | github.com/Harman5912

PROFESSIONAL SUMMARY

AI/ML Full Stack Developer, software developer, and founder with hands-on experience building AI-powered products, developer tools, automation systems, and full-stack applications. Founder and Core Developer of Crown Pierce, with flagship products Keys.AI and ReviewBOT. Skilled in Python, Java, C, C++, JavaScript, React.js, Angular, Node.js, Express.js, SQL, REST APIs, databases, cloud hosting, Generative AI, LLM applications, and Agentic AI. Built 125+ focused projects across 13 domains and achieved multiple competitive positions in hackathons, technical events, and research conferences.

TECHNICAL SKILLS

Programming: Python, Java, C, C++, JavaScript, HTML5, CSS3, SQL

Frontend: React.js, Angular, HTML5, CSS3, JavaScript, responsive UI/UX

Backend: Node.js, Express.js, REST APIs, authentication, server-side development, API integration

AI/ML: Generative AI, LLM applications, AI agents, Agentic AI, prompt engineering, AI automation, Claude/Anthropic, OpenAI, Google Gemini, OpenRouter

Databases: SQL, MySQL, Oracle SQL, relational database design, CRUD, data manipulation

Cloud/Deployment: Microsoft Cloud technologies, cloud hosting, application deployment, Netlify, Render

Tools: Git, GitHub, VS Code, GitHub Copilot

PROFESSIONAL EXPERIENCE

AI/ML Full Stack Developer Intern | Anti-AI, Technical Department | Full-Time Internship, 4 months

- Contributed to AI/ML-oriented software development and full-stack application workflows.
- Worked across frontend, backend, APIs, application architecture, debugging, and intelligent software systems.
- Integrated AI capabilities into practical product workflows and supported feature implementation.
- Used modern development tools and technical problem-solving to build functional software.

LEADERSHIP & ENTREPRENEURSHIP

Founder & Core Developer | Crown Pierce | Independent software studio focused on intelligent software, AI-powered applications, developer tools, automation platforms, and premium digital experiences.

- Led product ideation, software architecture, AI integration, full-stack development, backend engineering, API integration, UI/UX, testing, and debugging.
- Built products combining artificial intelligence, automation, usability, and product-focused design.

PROJECTS

Keys.AI | AI-powered desktop assistant and multi-provider AI workspace.

- Integrated OpenAI, Anthropic, Google Gemini, OpenRouter, and other LLM APIs.
- Supports AI conversations, coding assistance, document generation, productivity workflows, automation, and extensible AI architecture.
- Repository: github.com/Harman5912/KEYS.AI

ReviewBOT | AI-powered code review platform.

- Automated code analysis, intelligent developer feedback, code-quality analysis, issue identification, and best-practice recommendations.
- Supports repository analysis and review workflows designed to improve developer productivity and code quality.
- Live application: reviewbot-web.onrender.com

True Blade | Premium Crown Pierce software project focused on precision, speed, control, futuristic design, and cinematic presentation. Status: Coming Soon.

MedHelp / BharatHealth.co | Telehealth prototype with doctor/patient portals, WebRTC video consultations, medical-record uploads, medical shop, and AI chatbot integration using Google Gemini/OpenAI.

Drop of Hope | Blood donation and donor-management web platform.

Katana Web | Web-based customization application for interactive digital experiences.

AI Automation Systems | AI assistant concepts for computer interaction, workflow automation, and communication/productivity tasks.

PROJECT PORTFOLIO

125+ Minor Projects | Developed across 13 domains: Authentication & User Management, Productivity, AI-Based Applications, Education, Finance, Healthcare, E-Commerce, Social & Communication, Business, Real-Time Applications, Utility, Developer Tools, and Miscellaneous.

Verified examples: Smart Login System, JWT Authentication Portal, Multi-Role Dashboard, User Profile Manager, Password Manager, OTP Verification System, Email Verification Portal, Session Tracker, Account Activity Monitor, Biometric Login Simulator.

EDUCATION

Bachelor of Computer Applications (BCA) | 2024–2027

Relevant Coursework: Data Structures & Algorithms, Computer Networks, Database Management Systems, Operating Systems, Programming, Web Development, Artificial Intelligence, Computer Science Fundamentals.

TRAINING & CERTIFICATIONS

Python Development: Python fundamentals, OOP, data structures, file handling, exception handling, automation, and application development.

Java Development: Java fundamentals, OOP, classes and objects, inheritance, polymorphism, exception handling, collections, and application development.

Full Stack & Backend Development: Frontend, backend, REST APIs, authentication, database integration, API architecture, deployment, and full-stack application architecture.

Microsoft Cloud: Cloud computing fundamentals, Microsoft cloud technologies, cloud application architecture, cloud hosting, and deployment.

Oracle Database & SQL: SQL, relational databases, Oracle SQL, database design, queries, CRUD operations, data manipulation, and database management.

Agentic AI Development — Anthropic / Claude: AI agent architecture, Agentic AI, LLM application development, Claude/Anthropic technologies, AI automation, tool-using AI systems, prompt engineering, and agent workflows.

ACHIEVEMENTS & COMPETITIVE POSITIONS

Exuberance'26 – Tech Expo: First Runner-Up; Trophy; Blue Ribbon Medal.

NICHIS-2026: Second Runner-Up.

Hackathon 2.0 – March 2026: Second Position.

Smart India Hackathon 2025: Qualified for the Second Round.

National Conference – Women Skill Development: First Position.

Hackathon – February 2025: Third Position.

Hackofiesta 6.0 – AISpire UP Hackathon: Third Position.

RESEARCH & CONFERENCES

Research and technical conference experience including NICHIS-2026 and National Conference participation, with competitive recognition including Second Runner-Up and First Position.

CERTIFICATIONS & CREDENTIALS

8+ portfolio credentials including Exuberance'26 – Tech Expo, NICHIS-2026, Hackathon 2.0, Internal Smart India Hackathon 2025, National Conference – Women Skill Development, Hackathon – 20–22 February 2025, and Hackofiesta 6.0 – AISpire UP Hackathon.

ADDITIONAL INFORMATION

Portfolio Highlights: 125+ minor projects | 8+ certificates | 3 trophies | 5 medals | 2+ research conferences

Professional Strengths: Rapid prototyping, product thinking, technical experimentation, software architecture, AI integration, backend engineering, database development, cloud deployment, developer tooling, research and innovation, hackathon development, UI/UX engineering, automation

Availability: Open to internships, collaborations, software development opportunities, AI/ML projects, research, and freelance work.
